Education

October 2023 - March 2024
UNIVERSITY OF NIGERIA, NSUKKA – B.ENGR
Electrical Engineering

Projects

- MEETRO - FRONT END LEAD**
As Lead Front-End Developer for Meetro.live, I crafted a responsive, user-friendly platform for virtual meetings and events. I focused on clean UI, dynamic features like scheduling tools, and seamless collaboration with design and backend teams to deliver an intuitive and engaging experience.
- GROOVZ - FRONT END**
Engineered a Spotify web app in React JS with Tailwind CSS, allowing users to generate playlists based on selected songs. Utilized Axios for backend data consumption, showcasing expertise in front-end development and API integration. Featured seamless song selection, playlist creation, and user-friendly interface for an engaging music discovery experience.
- BANDAGE - FRONT END**
An e-commerce web app in React JS with vanilla CSS, enabling users to browse, view item details and add items to cart seamlessly. Used Redux and Redux Toolkit for efficient global state management, showcasing expertise in front-end development and state handling. Highlighted features include product viewing, cart management, and streamlined user experience for a robust online shopping platform.
- NESKY - FRONT END**
A professional portfolio website using React JS and Tailwind CSS, showcasing modern front-end skills. Emphasized responsive design, performance optimization, and accessibility features. Demonstrated expertise in code maintainability, and deployment for a polished and impactful web presence.

About Me

I am a highly skilled front-end developer with a portfolio of distinctive projects. My passion lies in crafting sleek and contemporary website designs. I prioritize perfection and user-friendliness in every detail. To stay abreast of the fast-paced technological advancements, I am committed to continuous learning and enhancing my skills.
